about me

Computer enthusiast with 10 years of experience in the design and development of information systems

skills

Full Stack Web Developer

Vue.js + Quasar Framework

Linux

Security

Curious⋆++ Creative⋆+++

Interests

Passionate about IT and new technologies

Education

2010	Master. in Computer Science	USTHB
	congestion control in multimedia sensor networks.	

Awards

Top 50	Rank top 50 of the best on the IT challenges site
URL	https://www.newbiecontest.org
Membre	abitaf (id=57735)

Project

-	Fleet management solution	i2b
	Development of a web and mobile fleet management application	
-	Covid19	i2b
	Design and development of a Covid-19 contamination management information system	
-	RIS/PACS	HCA
	Implementation and maintenance of a RIS-PACS system from the company EVOLUCARE for the central army hospital	
-	Mutual gestion	DOUANE
	Development of an information system for the management of the customs mutual	
-	Mobile clinic SANOFI	SANOFI
	Mobile platform equipped with the aim of welcoming patients for the screening of Arterial Hypertension and Diabetes and their vascular and cardiological complications	
-	Blood transfusion center information system .	CTSA
	Administration and management of blood donors and samples	
-	Laboratory information system	HCA
	- Design and development	
	- interfacing laboratory automatons	

Experience

2020-	Full stack web developer	i2b
	Design and development of information system for fleet management	
2011-2019	Programmer analyst	EUROSYS
	Design and development of solutions for medical information systems	

Other information

Review

- Full Stack Developer (Vue.js, Quasar Framework, NodeJS, HTML, CSS, JavaScript ES6, ASP.Net, SQL Server, Postgres, MySql)
- Experience in server virtualization : VMware, HyperV
- Health communication protocol : ASTM, DICOM, HL7, Mirth Connect
- Advanced use Debian-like Linux distribution
- Devops : Apache, nginx
- Competition challenges contestant
